ZBA:

As a former resident of Manchester, now in a retirement community in Bedford, MA., I would like to register my strong opposition to the Shingle Hill project. I spent many, many years saving land for conservation in Manchester, including Long Hill, and the Cedar Swamp area and the Gordon Woods. The proposed Shingle Hill project would create major negative impacts to water quality and valuable previously protected conservation accomplishments.

We do not want to slide backwards from previous gains.

Thank you,

Mary Waters Shepley
