SAY NO!!!! DENY THE APPLICATION

We the undersigned are asking the Zoning Board of Appeals to DENY the Comprehensive permit to build a Cluster Development of 136 units on the top of Shingle Place Hill. Shingle Place Hill is a wooded Sanctuary, surrounded by conservation land, wetlands and a source of our drinking water. The Development Proposed by SLV (Strategic Land Ventures) and currently in front of the ZBA has many **RED FLAGS** that should not be overlooked and validate the denial of the permit. Please see the reasons below and sign!

- Catastrophic destruction to Shingle Place Hill by clearing acres of trees and excessive blasting.
- Irreversible damage to the surrounding conservation land, wetlands, natural wildlife habitats and contamination to our **DRINKING WATER!**
- **19 Waivers** (a clear indicator this is a bogus project) have been requested by the developer to **bypass our local bylaws** that protect the very intact environmental integrity of our Town.
- 800 additional passes of traffic will pass on School street, a walking and biking route to the Town, schools, parks and beach.
- Traffic study shows **this project will exacerbate traffic congestion and strain the Town.**
- Single entry access to the site and development poses major safety issues.
- This project is **unsuitable in size, location, intention** and will forever change this small coastal Town.
