**Subject:** [EXTERNAL] - MBTA Task Force Meeting # 1: 6/8/2023: base line data

### **Attn: Ann Harrison**

CC: Ms Hunter, please forward to all MBTA Task Force Members not listed

Good Morning, Ann:

1. Does the Task Force have the State designed "**Multi-family Unit Capacity Tool**: to help communities calculate multi-family unit capacity in a consistent, transparent, and data-driven way? This tool is available from the State per Baker Administration. If so, please include on the Town Website.

2. Does the Task Force have the data point from the State *geoDot Coordinator on the Flood Risk Vulnerability Data on the commuter rail stop in Manchester by the Sea, MA on the Rockport Line using the **MBTA Commuter Rail Flood Vulnerability Viewer?** If so, please include on the Town website.*

*These base line data points appear to be necessary for any discussion, apart from legal issues, that KP Law will brief on and with regard to Rockport's pending suit challenging the State Guidelines.*

Regards,

Lorraine
