Thank you.

By this email, I would like to suggest a survey (much like we have done online in the past for the MP) to residents to measure their level of knowledge ref 3A and to collect data as a core vehicle regarding concerns about proposed zones, parking, etc all to be discussed and published for residents at a final meeting before TM in Fall. This zoning is perhaps the most critical that will change this Town, for better or worse. Let's get some real metrics.

Thank you,

Lorraine
